

MIDWAY INDUSTRIAL SYSTEMS

A Division of Midway Industrial Supply

SANITARY PUMPING AND METERING SOLUTIONS

Midway supplies Graco's complete line of sanitary pumping equipment, including many sizes of piston and diaphragm pumps. In addition, Midway designs and provides metering and dispense solutions for many applications. For high viscosity materials, Graco's piston pumps and systems (drum and bin unloaders) move ingredients up to 1,000,000 centipoise. Pumps are USDA and/or 3A approved with 303 or 316 stainless. Air operated pumps start and stop on demand with no extra controls.

Piston pumps for high viscosity materials . . .

- Bare transfer pumps for transfer of low and medium viscosity materials such as fruit juices, corn syrup and icing
- Drum unloaders for peanut butter, ricotta cheese, moist pet food, creamy candy fillings and more. Up to 23 gpm delivery
- Bin Evacuation Systems (BES) with evacuation rates up to 28 gpm. Used for jams and jellies, tomato paste, fudge, heavy chocolate, fruit paste and more
- No need to dilute most materials

DRUM UNLOADER WITH CONTROLS

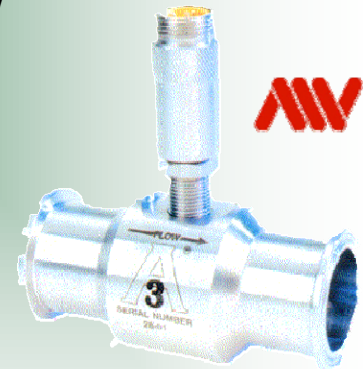

QUICK KNOCKDOWN HUSKY PUMP

Graco's Husky diaphragm pumps . . .

- NEW 3150 quick knockdown pumps (including a 3A Husky pump) with up to 4" tri-clamp connections and up to 150 gpm delivery
- FDA compliant and corrosion resistant pump lines
- Drum unloader and Bin Evacuation Systems available
- Patented air valve is non-stick and externally serviceable for quick repairs plus has a 15-year warranty

Metering and dispense solutions . . .

- Complete metering systems from Midway's Engineering group
- AW Company's ProScan on-line process sensor dramatically improves process control
- Sanitary flow meters for every application
- Digital display I/P converters
- Graco's CycleFlo for precise control of pump speed, run time and quantity of product delivered by pump

SANITARY TURBINE FLOW METER

Also available through Midway: Graco's popular air powered Hydra-Clean systems
