

RAZOR™

Sharpe knows that in today's auto refinish market, time truly is money. As painting professionals, you are faced with greater pressure in the market to complete jobs faster and to get them done right the first time. That's why we developed the RAZOR gun platform. It offers superior performance AND reduces production time.

One Universal Platform

The new RAZOR guns represent a single gun platform that supports painting needs from clear coat to primer material – making it easier to adjust to one gun, rather than switching between guns to complete various jobs. This means less time spent learning and maintaining multiple guns and more time spent in the spray booth. Plus, standardizing on a single gun family reduces your costs for replacement parts.

Premium Performance

In addition to a universal platform, the new RAZOR guns offer superior atomization, spray patterns and material flow that outperform competitive models. If your material demands high transfer efficiency, fine atomization or wide patterns, the RAZOR has got you covered.

Ordering Information

Part Number	Spray Type	Nozzle Size (mm)	Application
249994	LVLP	1.2	Base, Clear
253427	LVLP	1.3	Base, Clear

Razor Guns

Cut Down Your Production Time!

Introducing a new era in performance with the RAZOR gun family. No longer do painting professionals have to carry several different guns in order to achieve desired performance levels across different materials. The RAZOR offers superior performance in atomization, material flow and transfer efficiency – all from a single gun platform that addresses all of your material needs from primer to clear coat! In addition to attractive pricing far below competitive models, the RAZOR also reduces your cost of ownership by reducing the number of replacement parts. Nothing cuts down production time like a RAZOR!

The Razor HVLP Spray Gun

Offers generous material flow to help you get the job done quickly, with an exceptional atomization rate that promotes a superior finish – whether you're using clear coat, base coat or primer.

The Razor LVLP Spray Gun

Looking for amazing transfer efficiency or have a limited air supply? If so, this is your gun!

The Razor Conventional Spray Gun

Offers a wide variety of nozzle sizes and fast production times to meet your high-pressure needs.

The Razor Compliant Spray Gun

Provides the perfect blend of first-rate atomization and extraordinary transfer efficiency.

The Razor Siphon Spray Gun

Offers generous atomization for jobs that demand siphon delivery.
