

Finishing Line and Paint Booth Evaluations

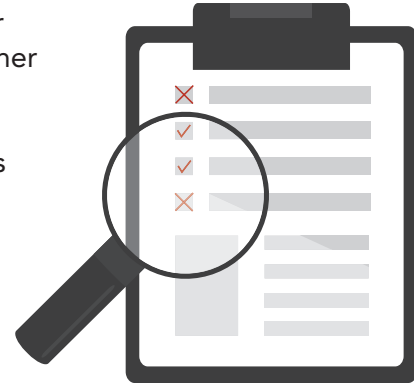

Midway Industrial Supply has decades of experience helping customers improve the efficiency of their finishing line operations. We can analyze your current process, identify areas of opportunity, and provide recommendations for how you can save time and money.

What we do

We can audit your entire paint finishing line from start to finish, or simply evaluate a paint booth or piece of equipment to see whether it's working the way it should.

For finishing line audits, we follow a 10-step process that analyzes every aspect of your finishing line, including:

1. Blast
2. Wash
3. Dry
4. Blow off
5. Prime
6. Flash
7. Topcoat
8. Cure
9. Cool
10. Unmask & Inspect

We identify trouble spots in each of these areas and provide process or equipment recommendations that can improve line efficiency, and save tons of money.

What you get

A detailed report outlining everything we find – good and bad. We work hand-in-hand with you and provide recommendations based on your business needs and overall goals.

What does it cost?

Costs vary based on the complexity of your finishing line or assesment needs. If our evaluation determines that you require any new equipment, you can apply the cost of the assessment towards the purchase of that equipment.

How can I learn more?

Call 1 (800) 279-1401 or email us at info@midways.com for more information.
